AI for Beginners – Project

1. Introduction
This project demonstrates the basic concepts of Artificial Intelligence (AI) learned during the course.
The focus is on understanding how AI can be applied in real-world scenarios.

---

2. Key Learnings
- What is Artificial Intelligence?
- Machine Learning basics
- Examples of AI applications in daily life

---

3. Mini Project: AI in Education
Idea:
Design a simple AI chatbot that helps students revise their lessons.

Workflow:
1. Student asks a question.
2. AI searches the course material.
3. AI provides a summarized answer.

---

4. Benefits of the Project
- Saves students' time.
- Provides personalized learning.
- Encourages self-study with instant answers.

---

5. Conclusion
This project shows how AI can support education and demonstrates a beginner's understanding of AI concepts.
